cadenz
IO

— JAPAN LAUNCH · 2026

Every Step, a Symphony.

The app that turns your walks and runs into original music: powered by GPS, played by AI, shared with the world.

🎵 GPS-to-Music | 🗺️ Location-Aware | JP Japan Market

8+ Scales | **5** Genres | **4** Instruments

¥2.7B	10M DL	73%	96M
JP music market	DQ Walk in 4 days	runners use music	LINE MAU

— THE OPPORTUNITY

Japan is the perfect first market.

Three cultural forces converge in Japan that make Cadenz.io uniquely positioned to win. Forces that exist nowhere else in the world at this scale.

Music Nation

Japan is the world's **#2 music market** at $2.7B. Music education is nearly universal. 65% of Japanese own a musical instrument.

Walking Culture

Japanese walk **7,800 steps/day** on average, among the highest globally. *Sanpo* (散歩) is a beloved cultural tradition. 6M+ active runners.

Gamification DNA

Pokémon GO earned **$200M+/year** in Japan alone. Dragon Quest Walk hit **10M downloads in 4 days**. Japan invented the walking game.

🌸 Hanami walking routes · ⛰️ Trail running (UTMF) · 🌆 Urban commuter walks · 🎤 Karaoke culture · 📱 60M smartphone users

— THE PROBLEM

Fitness is data-rich but soul-poor.

You finish a 5km run through Yoyogi Park. You get: your splits, your heart rate, a polyline on a map. Then what? You scroll past it tomorrow.

The route you ran was **unique to you**, shaped by your pace, your turns, your mood. But nothing captures that.

- ✕ Strava gives you pace graphs — not memories
- ✕ Apple Fitness shows calories — not creativity
- ✕ No app turns movement into something you want to share

TYPICAL FITNESS APP — AFTER YOUR RUN

DISTANCE	AVG PACE
5.2 km	5:42 /km
HEART RATE	**ELEVATION**
154 bpm	48 m

...and that's it. Forgotten by tomorrow.

— THE SOLUTION

Your route becomes your composition.

Cadenz.io converts every GPS point into a musical note. Your speed becomes tempo. Your turns become melody. Your route becomes a piece of music that only you could have written.

GPS Route
Your walk or run — anywhere in Japan

→

Music Engine
Bearing → melody · Speed → tempo

→

Your Composition
Unique. Playable. Shareable.

- Real Salamander Grand Piano samples
- FM Violin synthesis
- Genre-driven synths (Synth, Drums)
- 8 scales — Major, Blues, Dorian, Lydian...
- 5 genres — Classical, Jazz, Blues, Ambient...
- Reverb, pad harmonics, rhythm tracks
- Route map with Strava-style styling
- OG share cards for social media
- BPM, duration, distance analysis

PRODUCT FLOW

Three steps.
Infinite compositions.

1

Set Your Stage

Choose your genre (Classical, Blues, Jazz, Ambient, Electronic), scale, starting note, and instrument (Piano, Violin, Synth, Drums) before you go.

🎹 Piano · 🎻 Violin · 🎵 Classical

2

Walk, Run, Explore

Live GPS tracks your route in real-time. Every point becomes a note. Your pace sets the tempo. Direction changes shape the melody.

🚶 Walk the route · 🔄 Turns shape melody · ⚡ Faster pace = faster beat

3

Listen & Share

Your composition plays instantly. Share it with followers, explore others' routes on the world map, earn badges as you compose more.

🏆 Level up · ❤️ Like & follow · 🌍 World map

LIVE PRODUCT

Fully working PWA, ready to ship.

Built on Next.js 16 + Tone.js + Supabase. Real-time GPS, web-audio synthesis, social graph: production-ready today.

MARKET SIZE

A ¥900B+ opportunity at the intersection of three markets.

¥350B

Digital Music Market

Japan is #2 globally. Streaming growing 18% YoY. Music education near-universal.

¥280B

Fitness App Market

6M+ registered runners. 35M+ regular walkers. Post-COVID fitness surge.

¥270B+

Mobile Gaming Revenue

Highest mobile ARPU globally. Japanese users spend 3× US average on apps.

White space confirmed: No Japanese app currently combines GPS route recording with music composition. Zero direct competitors. **330,000+ Tokyo Marathon applicants** for 38,000 spots. The market is hungry and untapped.

COMPARABLE LAUNCHES IN JAPAN

Pokémon GO	AR + GPS + walking	**55M DL** — Japan: Niantic's #1 revenue market
Dragon Quest Walk	GPS + walking + J-RPG (Square Enix)	**10M DL** — in 4 days · $400M+ lifetime revenue
Pikmin Bloom	Nintendo × Niantic — "walk to create"	**#1 JP** — App Store at launch (2021)

OUR TARGET SEGMENTS

Urban Sanpo Walkers	35M
Runners & Joggers	6M
Trail Runners / Hikers	2.5M
Music Creators	8M+

CULTURAL FIT

Japan didn't just adopt walking apps. It invented them.

散歩 Sanpo Culture

The Japanese tradition of mindful leisure walking is centuries old. Cadenz.io turns every sanpo into a musical memory.

Route as Journey

Shikoku pilgrimage, Kumano Kodō, Tōkaidō. Japan has a 1,300-year tradition of treating routes as spiritual experiences. We give that music.

Collector Mindset

Gacha, stamps (eki-stamp), card games: Japan is a nation of completionists. Every new route = a new composition to collect.

Music in Daily Life

65% of Japanese own instruments. Karaoke is a weekly ritual. Japan has more record stores per capita than any nation. Music is identity here.

森林浴 Shinrin-yoku

"Forest bathing": Japan's government-promoted practice of mindful outdoor time. Ambient and classical compositions are a perfect sonic companion.

Vocaloid & DTM Culture

Japan invented AI music creation as a consumer product (Yamaha Vocaloid, Hatsune Miku). Millions compose at home. Cadenz.io is the next chapter: compose with your body.

Mobile-First + LINE Nation

73% of Japanese runners listen to music while training. **96M** LINE MAU. **70% iPhone** market share. Japan is the world's most valuable iOS market.

Freemium + Partnerships + B2B API

Three revenue streams that compound — starting with direct subscriptions, growing into brand partnerships and enterprise licensing.

FREE

¥0 / forever

- ✓ 30 min recording cap
- ✓ 10 compositions
- ✓ Classical + Blues
- ✓ Piano + Synth
- ✓ Full social features

PRO

PRO

¥980 / month

¥700/mo annual · save 28%

- ✓ Unlimited everything
- ✓ All 5 genres
- ✓ All 4 instruments
- ✓ Persona & style tags
- ✓ MP3 export (coming)
- ✓ Strava import (coming)

BRAND API

¥50M+ / partner

- ✓ Branded route challenges
- ✓ Co-branded compositions
- ✓ Exclusive genre packs
- ✓ Campaign analytics
- ✓ White-label player

REVENUE PROJECTIONS — YEAR 1 JAPAN

50K	5–6%	¥29M+
Free MAU (target)	Conversion (JP above global avg)	ARR Year 1

Carrier billing lever: Docomo / SoftBank DCB increases subscription conversion **2–3× vs. credit card** — a Japan-specific revenue accelerator no Western app fully utilises.

— GO-TO-MARKET

Digital-first launch, partnership-accelerated growth.

PHASE 1 — DIGITAL LAUNCH

App Store Japan (PWA + Capacitor)
PWA live now · Native wrapper Q2 2026

Instagram / X / TikTok
OG share cards auto-generate shareable route + waveform visuals

Running communities
Strava clubs, Tokyo Marathon group, UTMF trail community

Creator seeding
Music YouTubers, running influencers, onsen/nature content creators

PHASE 2 — PARTNERSHIP CHANNELS

Sports retail bundles
Asics / Mizuno shoe purchase → 3-month Pro trial QR code

Telecom bundles
NTT Docomo / Softbank app subscription packs

Ryokan & wellness tourism
Mont Bell / onsen resorts: "record your nature walk, take your music home"

Gaming crossovers
Bandai Namco challenge events · Konami Sports gym integration

— STRATEGIC URGENCY

The window is open.
Move fast, lock in partners.

The GPS-to-music category is uncontested today. That won't last. A strategic partner doesn't just accelerate growth — it raises the barrier to entry high enough to make the category defensible.

DQ Walk proved this mechanic can reach **10M users in 4 days**. A well-resourced incumbent — Square Enix, Niantic, or a telco — could clone it. **Partnering before launch is the moat.**

WHAT A STRATEGIC PARTNER UNLOCKS

Defensibility before scale
An exclusive co-branded experience (e.g. Asics × Cadenz) is contractually protected. A competitor can copy the app — not the partnership.

Instant distribution
Asics Runkeeper or LINE (96M JP users) as a launch channel skips 12–18 months of organic growth.

Revenue before profitability
Brand API deals (¥50M+/partner) fund the roadmap independently of subscription ramp-up.

Aligned incentives
A partner with skin in the game turns their retail network, user base and events into our acquisition engine.

PRIORITY TARGETS — CLOSE BEFORE LAUNCH

Asics / Runkeeper — Tier 1
Distribution · Co-brand · Revenue share

Yamaha Music — Tier 1
Instrument quality · Cultural credibility

LINE / LY Corp — Tier 2
96M MAU · Mini-app + LINE Music

Bandai Namco / Konami — Tier 2
IP routes · Rhythm game crossover

Goal: close a Tier 1 partnership before public launch.
First-mover + exclusive partner = category owned, not just entered.

STRATEGIC PARTNERSHIPS

Japan's biggest brands have every reason to say yes.

Each partner gets a branded music experience that no other fitness or music platform can offer. We turn their products into compositions.

SPORTS & OUTDOOR

ASICS
HQ Kobe · Already owns Runkeeper (acq. $100M) · Cadenz as creative layer on Runkeeper data

Mizuno
Osaka · Marathon relay compositions · Mizuno Wave genre pack

Mont Bell
Trail & hiking · "Record your mountain" campaign · Nature playlist packs

Descente
Premium run apparel · Embedded Pro trial with gear purchases

ENTERTAINMENT & MUSIC

Bandai Namco
IP route challenges (Pac-Man, Taiko) · Co-branded collectible badges

Yamaha Music
Invented Vocaloid / AI music creation · Premium sample packs · "Walk to Compose" school curriculum

Konami
DDR / beatmania rhythm game DNA · Konami Sports 400+ gyms · "beatmania mode" for Cadenz routes

LINE / LY Corp
96M MAU in Japan · LINE mini-app + LINE Music · Share your composition in a LINE message

NTT Docomo
Telecom bundle · Docomo d Point integration · National distribution

— ROADMAP

From Beta to platform play.

● PWA Beta is live now · Testing underway · Ready to scale

PHASE 1 — Q2–Q3 2026

Launch & Core

● PWA Beta live · Testing active

- ✓ **PWA Beta — live & testable now**
- ✓ **Japanese UI — localised & shipped**
- ✓ **MP3 export — ready**
- – Native iOS/Android (Capacitor)
- – J-Pop / Enka genre pack
- – Osaka + Tokyo city challenges

PHASE 2 — Q4 2026

Social & Gamification

- ✦ 🎮 Hidden Notes — Pokémon GO-style collectibles on real routes
- ✦ 🎼 Orchestra Mode — multi-user real-time compositions
- ✦ 🔗 Strava import
- ✦ 🏆 City Leaderboards
- ✦ 🎁 Season Pass (gacha-style limited drops)
- ✦ 🤝 ASICS + Mizuno integrations
- ✦ 📹 Video export (route + waveform)

PHASE 3 — 2027

Platform & API

- ○ 🌏 Korea & Southeast Asia expansion
- ○ 🎤 Brand API — white-label for Bandai campaigns
- ○ 🎵 Streaming distribution (Spotify · Apple)
- ○ 🤖 AI arrangement engine (harmonise any route)
- ○ ⌚ Apple Watch + WearOS native
- ○ 🏢 Corporate wellness (B2B HR)

FUTURE VISION — PHASE 2 HIGHLIGHT

"Hidden Notes" — Pokémon GO for music.

Rare musical fragments hidden at real-world locations across Japan. Walk there, collect them, incorporate them into your compositions. A global treasure hunt powered by sound.

🗺️ How it works

Rare notes seeded citywide
Cadenz hides rare musical fragments at shrines, parks, landmarks. New drops weekly.

Walk to unlock
GPS proximity unlocks the note. It plays through your headphones in real-time — you hear the melody as you arrive.

Compose with your finds
Collected notes become building blocks. Use them in your next composition for a unique sound only you own.

Trade & collaborate
Gift notes to friends. Rare "Legendary" notes found only during festivals — cherry blossom, O-bon, New Year's.

🎯 Why it works in Japan

- **Proven template:** DQ Walk drives 30M+ users to walk specific routes. Notes = quests.
- **Seasonal events:** Japan's calendar is event-driven. Exclusive notes at Hanami = massive FOMO.
- **Tourism tie-in:** JR / tourism boards can sponsor note drops at destinations to drive foot traffic.
- **Brand drops:** ASICS drops exclusive "Marathon Note" at race finish lines. Bandai drops anime themes.

🎼 Orchestra Mode

Multiple runners, same route, different instruments. Each runner's path adds a layer (piano, violin, drums, synth), composing together in real time.

🎹 Runner A = Piano | 🎻 Runner B = Violin | 🥁 Runner C = Drums

— WHY WE WIN

Defensible moat, not just a feature.

CAPABILITY	Cadenz.io	Strava	DQ Walk	Spotify
GPS → Music generation	✅	❌	❌	❌
Location-based gamification	✅	⚡ Segments	✅	❌
Social composition sharing	✅	❌	❌	⚡ Playlist
Fitness tracking	✅	✅	✅	❌
Unique per-user creative output	✅	❌	❌	❌

🌸 **Pikmin Bloom precedent:** Nintendo × Niantic proved Japan loves "walk to create something." Pikmin Bloom hit #1 JP App Store in 2021 with the mechanic of planting digital flowers along your route. Cadenz.io builds on that same mechanic, but your creation is a piece of music you can actually share, play, and own.

🔒 Composition Library Lock-in

Every composition a user creates is a reason to stay. The longer they use Cadenz, the richer their personal library. Switching costs are real and compounding.

📊 GPS-to-Music Data Moat

We accumulate route-to-music mappings that train our engine to generate more culturally-tuned compositions over time. Proprietary dataset, no one else has it.

🌏 Japan-Deep Localisation

Japanese UI shipped. J-Pop / Enka genre packs on roadmap. Yamaha partnership for instrument quality. No Western fitness app has gone this deep.

— THE ASK

Let's compose Japan's next cultural moment.

We're raising a bridge round to fund the Japan launch, product roadmap, and partnership activation. Tickets from ¥25M. Strategic partners who understand Japan preferred.

MIN. TICKET
¥25M

BRIDGE ROUND
Japan launch · 12-month runway
¥160M

CAPITAL ALLOCATION

35%	30%	20%	15%
Engineering & Product	GTM & Marketing Japan	Partnerships & BD	Ops, Admin & Legal
¥56M	¥48M	¥32M	¥24M

🤝 Strategic partners welcome

JP Japan-based VCs ideal

cadenz

"Your route is already music. We just let you hear it."

cadenz.io

WE'RE LOOKING FOR

- JP Japan market expertise & network
- 🎮 Entertainment / gaming industry connections
- 🤝 Brand partnership introductions (Asics, Bandai...)
- 💴 ¥25M min ticket · bridge target ¥160M
